Instructor: Dr. Fahman Saeed

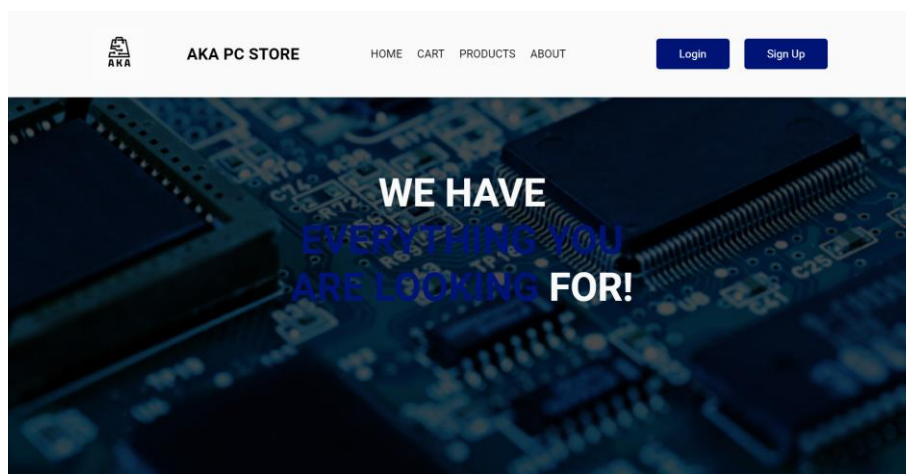

1.Overview:

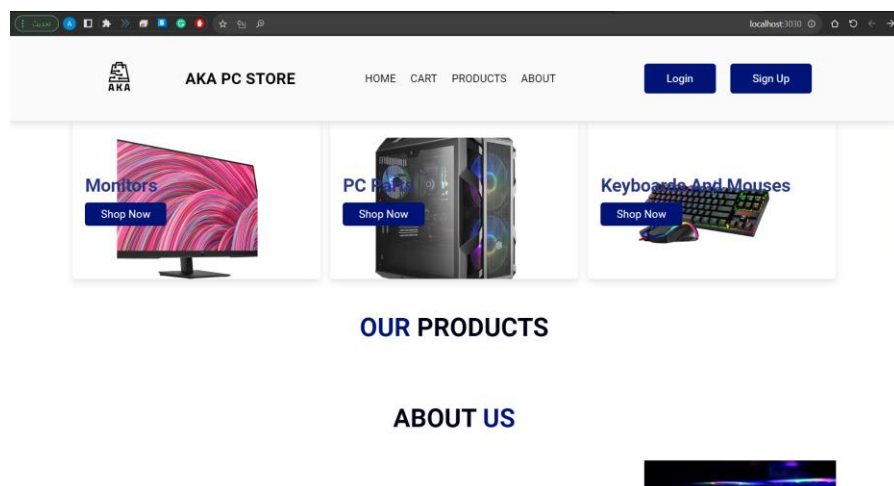

In this project, we will be creating a website using "HTML, CSS, JS".

Our website will be a store that we called: AKA STORE PC, for selling PC parts.

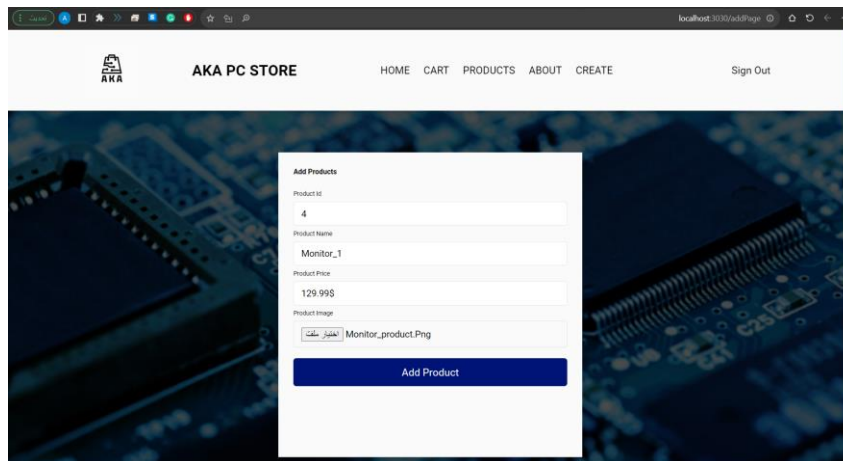

The website should have an admin page, and a client page. The admin should be able to add and edit and delete the products, while the client is only able to add and delete items from the cart.

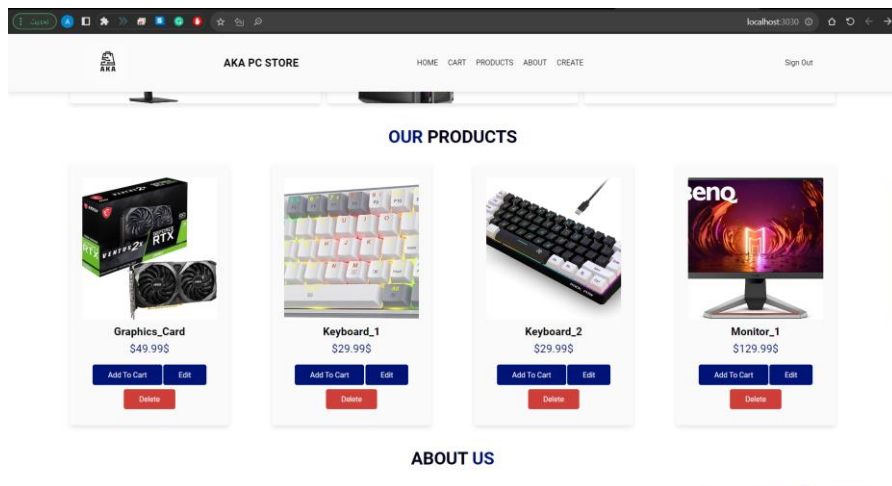

The interface

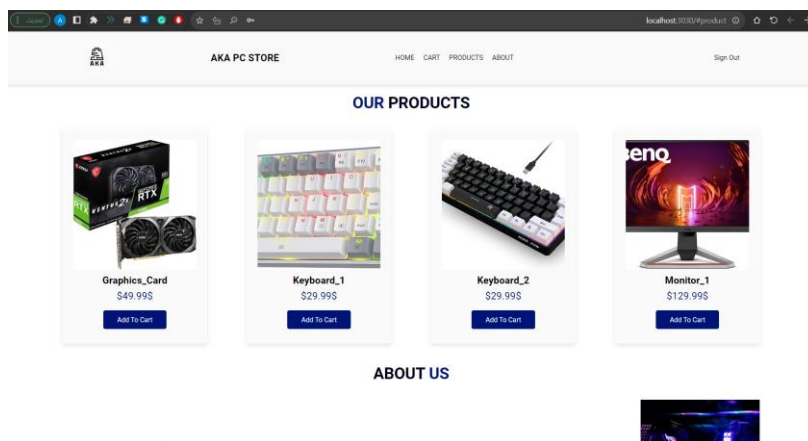

Before adding the Products

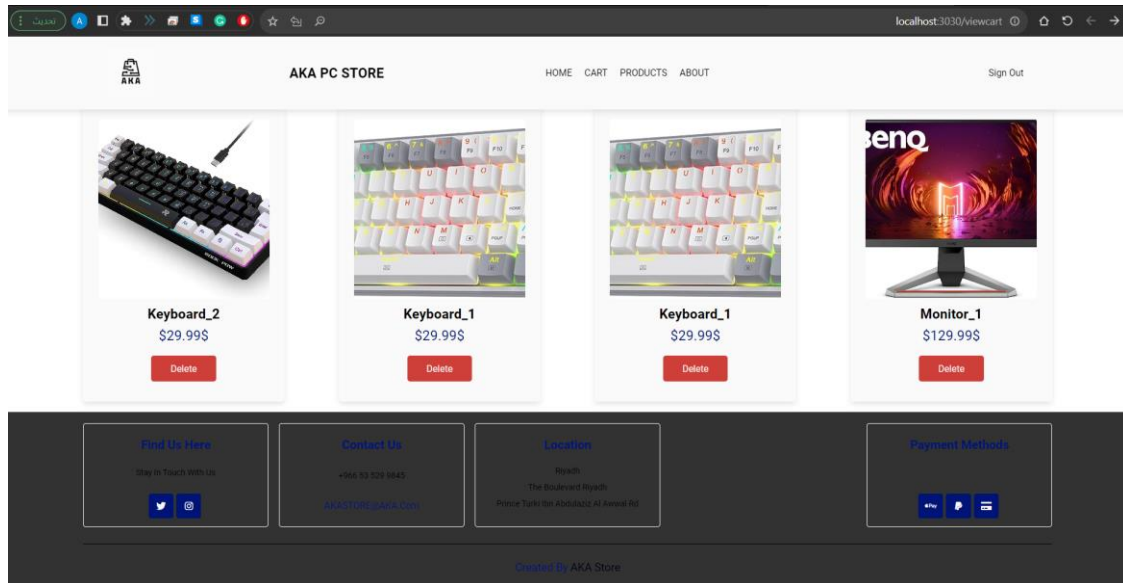

Adding items

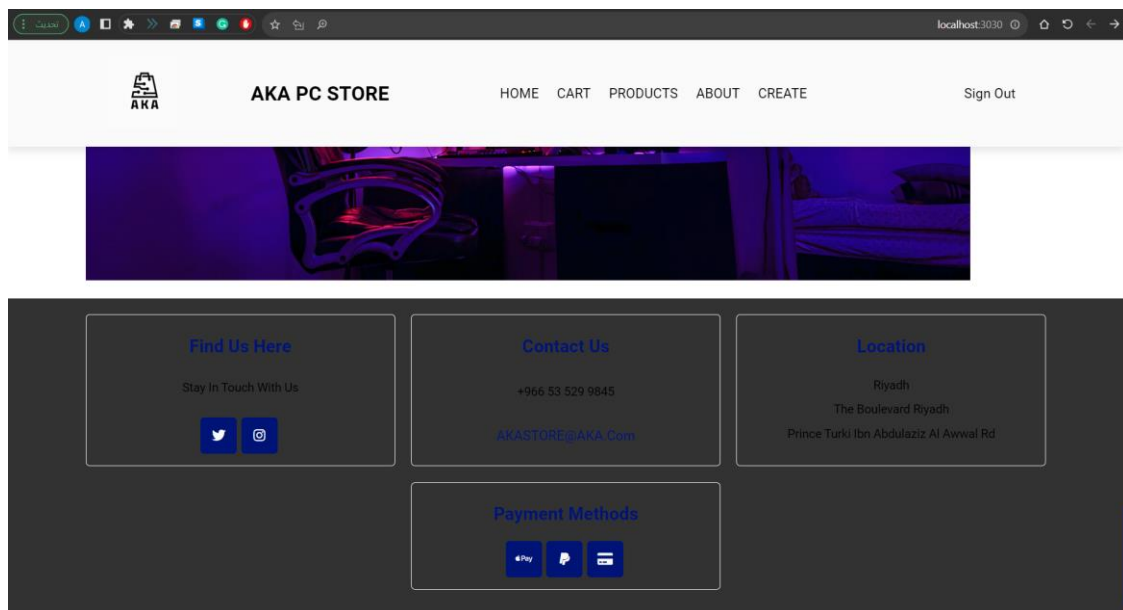

Admin view for the products

Client view for the products

The cart after adding some items

The footer

2. User Intraction:
